Strong tri-genic epistasis among natural alleles of module
OsMYB2-OsGH18-OsCAD3 confers improved drought tolerance in rice

Mingyue Huo, Shanwen Wang, Fan Zhang, Min Li, Ming Yin, Yuxin Lei, Yanfang Wang, Yanjun Chen, Dapu Liu, Xiuqin Zhao, Binying Fu, Fengyi Hu, Jianlong Xu, Zhikang Li, Wensheng Wang

PII: S1674-2052(26)00006-7

DOI: <https://doi.org/10.1016/j.molp.2026.01.005>

Reference: MOLP 2073

To appear in: *Molecular Plant*

Received Date: 23 June 2025

Revised Date: 16 January 2026

Accepted Date: 16 January 2026

Strong tri-genic epistasis among natural alleles of module *OsMYB2-OsGH18-OsCAD3* confers improved drought tolerance in rice. *Molecular Plant* doi: <https://doi.org/10.1016/j.molp.2026.01.005>.

This is a PDF of an article that has undergone enhancements after acceptance, such as the addition of a cover page and metadata, and formatting for readability. This version will undergo additional copyediting, typesetting and review before it is published in its final form. As such, this version is no longer the Accepted Manuscript, but it is not yet the definitive Version of Record; we are providing this early version to give early visibility of the article. Please note that Elsevier's sharing policy for the Published Journal Article applies to this version, see: <https://www.elsevier.com/about/policies-and-standards/sharing#4-published-journal-article>. Please also note that, during the production process, errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
